Findings: The data show 16,767 convictions for stealing a motor vehicle in Florida, and the crime is not spread out evenly across the state. Large urban counties get most of the cases: Miami-Dade records a little over 1,000, Broward is close to 900, and other busy areas such as Orange, Hillsborough, Duval, Polk, Pasco, Volusia, and Palm Beach each fall in the 500–900 range; together, these ten counties hold roughly two-thirds of all convictions. At the other end, small rural counties like Liberty, Lafayette, Wakulla, and Gadsden see fewer than 30 cases apiece, and the ten lowest counties combined make up only about one percent of the total. This big gap suggests grand-theft-auto is mainly an urban problem where there are more cars, higher populations, and faster road networks for getaways, so enforcement tools—extra patrols, license-plate readers, and prevention programs—should stay focused on the high-count counties, while rural areas can concentrate on community awareness and basic vehicle security.
